

---

*Print one copy and cut out the Ark. This will be used in the lesson along with a board drawing to illustrate the progression of the Flood. Draw a simple scene on the board that includes a flat line to indicate ground and hills of varying height. As the students read about the rising Flood, draw a wavy water line that gets higher and higher. Place the Ark on top of the water to demonstrate how deep the water rose, according to Genesis 7. Detailed directions are contained in the lesson.*
