## **How Many Trips to the Well?**

A beautiful young maiden left her home carrying a water jug that could hold five gallons of water. On the way to the well, her friend told her that a thirsty camel can drink thirty gallons of water at one time.

When she reached the well she found ten very thirsty camels!

	, ,
1.	How many jugs did she need to water one camel?
2.	How many trips down the steps to the well would the maiden need to make to water all the thirsty
	camels?
2	How many trips up?
5.	riow many trips up:
4.	How many trips altogether to water the ten camels?
