

A Project with Potential Script

Characters: Trevor and Shelly

Trevor: (*chatting to his twin sister about the Bible project they have been assigned to do*)
Shelly, I have a great idea for my Bible project.

Shelly: So do I. I can't wait to get started.

Trevor: (*sounding worried*) Oh, no! What if we both chose the same Scripture?

Shelly: Ummm . . . Well, I'll give you a hint about mine. It's in the New Testament.

Trevor: It isn't the same, then, because mine is in the Old Testament.

Shelly: Mine is about someone who depended on the Word of God for courage and strength.

Trevor: So is mine!

Shelly: And mine is about someone who obeyed God because He had a very important thing to do.

Trevor: Mine too!

Shelly: (*excited*) Maybe we should work together on this project. That would be neat.

Trevor: Ok. I'm in.

Shelly: So, you go first! Who is your person?

Trevor: Joshua. He led the Israelites after Moses died. God asked him to do some pretty amazing things. God told Joshua to keep the Law in his mind all the time because Joshua would need strength and courage to follow God.

Shelly: That's right. He was supposed to meditate on it day and night and be careful to do what was written in it.

Trevor: Yes! The Word of God is very important. So, who did you pick?

Shelly: Well, I picked Jesus! He is the Word. He knew the Word. And He spoke the Word in the desert when He was being tempted by the devil. Remember?

Trevor: Oh, yeah. I remember. Jesus used Scripture to stop Satan's temptations. The Word of God gave Jesus strength and spoiled Satan's plans to make Jesus sin!

Shelly: Yep. Jesus knew Scripture and used it His whole life. He taught it and He was obedient to it. The Bible says He was obedient even to the point of death.

Trevor: Joshua *and* Jesus got strength and courage from God's Word. And they were able to obey God's will. Wait. That's great! We can use that for our project.

Shelly: This project has potential. I think we should pray for God's help right now! And then get started!

Trevor: Let's do it!
