

Four in a Row

INSTRUCTIONS

Use masking tape to make a 16-section square on the floor. The square should be four sections wide by four sections high. Each section should be equal in size. Cut 8 red circles and 8 black circles from the red and black construction paper.

Divide the students into two teams—red team and black team. Give each team eight paper circles—either red or black. Students will toss the beanbag to a square. They will answer a question. If they answer correctly, they can put a marker in that square. To win the game, teams must get four circles in a row—achieved by answering the questions correctly.
